

Do you have VITILIGO?

Help improve the options
for people with vitiligo.

A research study is evaluating an investigational medication for vitiligo to determine if it may help improve the condition.

This research study may be an option if you:

- Are between the ages of 18 - 65
- Have been diagnosed with vitiligo for at least 3 months
- Have vitiligo on the face and the body
- Are willing to avoid prolonged exposure to the sun or tanning lights

Other criteria apply.

Qualified participants will receive all study-related care and study medication at no cost. Financial compensation is also provided for time and travel expenses.
