Research Study

# ECG Device

**A research study is evaluating the data collected from an investigational ECG device.**

**An ECG (electrocardiogram) measures the electrical activity of the heart.**

**This research study may be an option if you:**

- Are at least 22 years of age
- Are able to wear a wrist-worn device

**We are enrolling individuals with various types of heart rates and rhythms including normal, irregular, low, or high.** Please make sure to discuss with a member of our research staff to ensure this study is a good fit for you.

By participating in a medical device study, you will be contributing to the development of medical technology. Financial compensation may also be provided for study-related time and travel expenses. **Limited spaces are available, schedule your visit today.**
