

# 3D Mammography

Now Available!

State-of-the-art  
3D mammography is  
now available in Leland.

Through 3D mammography, we are able to create 3D images that can be read/interpreted by our radiologist. A 3D mammogram more accurately detects abnormalities in breast tissue (including dense breast tissue) and helps diagnose cancer sooner. For your comfort, the paddle releases breast compression instantly after the images are taken.

*Time for your  
mammogram?*

Contact your provider to schedule your annual screening.
